go to https://prototype.ioos.us/nwm, clock 'view' for Short-Range Forecast (18 hours) will bring you to this page
Another choice is 'view' Medium-Range Forecast (240 hours0

Dataset Access Form

NOAA National Water Model Short-Range Forecast (Latest)

Hide Global Attributes

TITLE	OUTPUT FROM NWM v2.2
featureType	timeSeries

dev	dev_ prefix indicates development/internal meta data

Dimensions

no idea what is 'feature_id', I went to https://water.noaa.gov/map, the Reach ID for Skokomish River is 24285486, much larger than max feature_id here

	min	max	step
feature_id	0	2,776,737	1
time	0	17	1
reference_time	0	0	1
lat_lon	0	1	1

Variables

I selected all of them

lat_lon View options	feature_id	0:1:2776737	lat_lon	0:1:1
time_offset View options	time	0:1:17
